

SONIC RANGE

ULTRASONIC CLEANING MADE SIMPLE

Industrial grade cleaners, designed for the toughest applications

- Built in heater
- Sealed electronics
- Smart LCD display
- Degas feature
- Stainless steel tank
- Stainless steel basket & lid included
- Timer (0–60min)
- Ultra quiet operation
- Full CE and RoHS approval
- 24 month warranty

Ultrasonic cleaners function by producing sound waves that are transmitted into the tank and cleaning solution. These waves create millions of microscopic bubbles, which collapse or 'implode', releasing large amounts of energy, which scrub the surface clean. This process is called 'Cavitation'. These tiny bubbles create incredible cleaning results not only to the surface, but by penetrating the finer detail and recesses in jewellery and precision parts to restore them to their former glory.

EXAMPLE APPLICATIONS

Jewellery Shops
Optical Laboratories
Chemical Laboratories
Medical Rooms
Dental Clinics
Electrical Component Makers
Watch / Metal Part Makers
Shooting Clubs
Special Education Institutes
Golf Clubs
Mobile Phone Service Shops
Printing Shops
Automotive Repair Shops
